APPLICATION

Using The 2-Valve Manifold
In normal operation the “isolate” valve is open while the “vent” valve is closed. To remove the instrument, first close the “isolate” valve, then open the “vent” valve to relieve pressure upstream of the “isolate” valve.

Calibration Options
By connecting a calibration gauge to the vent port, it is possible to check the calibration of the instrument without removing it from the installation.
Also available in a range of other materials and options (See HOW TO ORDER Data Sheet)

WEIGHT = 1.0 kg
